**EN54 Certified**
Independently tested & certified to the prestigious EN54 standard for Fire Systems

**Total Flexibility**
Wireless single & dual path variants to support any installation

**Maximum Reliability**
Sends signals via network diverse 4G WorldSIMs for maximum uptime & total resilience

**Cost-effective**
Just a small increase to monthly/annual fees for total peace of mind and control

# The Benefits of Monitored Fire Alarm Signalling

- 60 fires a day occur in or beside vacant or derelict properties in the UK (Home Office Statistics).

- When a Fire occurs and the premises are empty, it will not be reported unless someone nearby sees it or hears the alarm.

- A Fire System with Professional Signalling reports any faults or alarms to a Monitoring Centre, providing 24/7 365 peace of mind for premises owners.

- Arson - just like criminal damage and theft - is much more common in empty buildings as opposed to those which are occupied. Monitored Fire Systems allow for faster reporting of incidents as well as acting as a deterrent.
